

Navajo Technical University (NTU) offers a range of courses in computer science, business computer information systems (BCIS), and cybersecurity (CYB) that could complement a major in Construction. Here are some introductory courses from each field that a student might consider:

1. **Computer Science (CS):**

- Introduction to Computer Science
- Programming Fundamentals
- Data Structures and Algorithms
- Introduction to Web Development
- Introduction to Database Systems

2. **Business Computer Information Systems (BCIS):**

- Introduction to Information Systems
- Introduction to Business Applications Software
- Business Data Communications and Networking
- Systems Analysis and Design
- Information Security Fundamentals

3. **Cybersecurity (CYB):**

- Introduction to Cybersecurity
- Network Security Fundamentals
- Cryptography and Network Security
- Ethical Hacking and Penetration Testing
- Cybersecurity Policy and Compliance

These courses can provide a strong foundation in computing and information technology, which can be beneficial for students majoring in Construction who want to enhance their skills in areas such as project management, data analysis, and information security within the construction industry. It's important for students to consult with their academic advisors to ensure that their chosen courses align with their career goals and degree requirements.
