At New Mexico Highlands University, a Nursing major might take the following introductory Computer Science (CS) courses:

1. **CS 1000: Introduction to Computer Science** - This course provides a general overview of computer science concepts and applications, focusing on problem-solving and basic programming skills.
2. **CS 1010: Computer Science I** - A more focused course on programming fundamentals using languages like Python or Java, covering basic algorithms, data structures, and software development principles.
3. **CS 1020: Computer Science II** - This course builds on CS 1010, introducing more advanced programming concepts, data structures, and algorithms.
4. **CS 1050: Introduction to Web Development** - Focuses on creating and managing websites, which could be useful for developing healthcare-related online tools or resources.
5. **CS 1060: Introduction to Data Science** - Covers basic data analysis techniques and tools, which could be relevant for handling healthcare data.

The exact course offerings may vary, so it's a good idea to check the most current catalog or consult with an academic advisor for the latest information.
