

15 Jobs in the **Agriculture Career Field** that Use Technology (there's more!)

Agricultural Data Scientist: Analyzes big data to optimize crop management and predict market trends. Average salary: \$100,000.

Agricultural Engineer: Designs and develops farming machinery and equipment, integrating technology for efficiency. Average salary: \$80,000.

AgriTech Software Developer: Creates software solutions for farm management, logistics, and data analysis. Average salary: \$95,000.

Agronomist: Uses data analytics to study and improve soil health, crop yields, and sustainable farming practices. Average salary: \$70,000.

Aquaculture Technician: Uses technology to monitor and manage fish farming systems. Average salary: \$50,000.

Bioinformatics Specialist: Utilizes data analysis tools to study plant genetics and improve crop resilience. Average salary: \$85,000.

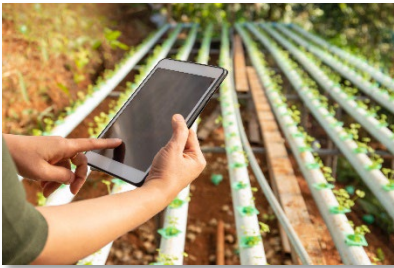

Crop Modeling Specialist: Develops simulations using technology to predict crop growth under various conditions. Average salary: \$70,000.

Digital Farm Manager: Oversees farm operations using digital tools, sensors, and software for efficiency. Average salary: \$65,000.

Environmental Compliance Specialist: Uses technology to ensure agricultural practices meet environmental regulations. Average salary: \$60,000.

Food Scientist: Applies technology to develop and improve food processing, safety, and packaging. Average salary: \$65,000.

Greenhouse Technician: Manages climate control systems, sensors, and automation in greenhouses. Average salary: \$55,000.

Hydroponic Specialist: Manages technology-driven, soil-less farming systems for efficient plant growth. Average salary: \$60,000.

Remote Sensing Specialist: Uses satellite imagery and data to assess crop health and manage resources. Average salary: \$75,000.

Robotics Engineer: Develops robots for automated planting, harvesting, and packaging tasks. Average salary: \$90,000.

Soil Scientist: Uses technology to study soil properties and recommend best practices for land use. Average salary: \$70,000.
