

15 Jobs in the **Automotive Career Field** that Use Technology (there's more!)

3D Printing Technician: Uses 3D printing technology to create automotive parts and prototypes. Average salary: \$55,000.

ADAS (Advanced Driver Assistance Systems) Engineer: Develops and tests systems that assist drivers, such as automatic braking or lane-keeping. Average salary: \$90,000.

Automotive Data Analyst: Analyzes data from vehicle systems to improve performance and safety. Average salary: \$75,000.

Automotive Design Engineer: Designs vehicle components using CAD software and other digital tools. Average salary: \$80,000.

Automotive Quality Assurance Analyst: Uses technology to ensure that vehicles meet regulatory and safety standards. Average salary: \$70,000.

Automotive Robotics Engineer: Works on integrating robotics into automotive manufacturing and vehicle functions. Average salary: \$88,000.

Automotive Software Engineer: Develops and maintains software systems for vehicle control and diagnostics. Average salary: \$85,000.

Autonomous Vehicle Engineer: Works on the technology that enables self-driving cars. Average salary: \$100,000.

Battery Management System Engineer: Focuses on the design and optimization of battery systems for electric vehicles. Average salary: \$95,000.

Calibration Engineer: Adjusts and fine-tunes vehicle control systems for optimal performance. Average salary: \$82,000.

Diagnostics Specialist: Uses technology to diagnose and repair vehicle malfunctions. Average salary: \$60,000.

Electric Vehicle (EV) Technician: Specializes in maintaining and repairing electric vehicles and their components. Average salary: \$65,000.

HMI (Human-Machine Interface) Designer: Designs the interface between the driver and the vehicle's technology systems. Average salary: \$85,000.

Machine Learning Engineer: Applies machine learning algorithms to improve vehicle performance, safety, and automation. Average salary: \$110,000.

Vehicle Test Engineer: Conducts tests on vehicles and their components to ensure quality and safety standards. Average salary: \$78,000.
